

The lead pipeline

The pipeline shows where each lead sits, who owns it, which product path it belongs to and what happens next. The board carries status and movement, not prose.

Owner: Commercial · 2026 · Confidential

IN SHORT

The pipeline shows where each lead sits, who owns it, which product path it belongs to and what happens next. **The board carries status and movement, not prose.**

ACTIVE STAGES

New → Onboarding

Four stages a lead card moves through left to right.

THE CARD

Readable without opening

Contact, owner, company, product, agent, task.

THE DETAIL

Notes · Tasks · Files

Working context lives inside the lead, not on the board.

PIPELINE RULE

Status, owner and next step must be visible. If those three things are unclear, the lead card is not ready for review.

The board reads from left to right

Each column is a stage. A lead card moves right as the lead becomes more concrete. Side stages keep long-term, parked or closed leads out of the active sales flow.

Pipeline view. Stages show status. Lead cards show the active owner, company, product path and next action.

The stage signals what kind of action a lead needs

STAGE	WHAT IT MEANS	ADVANCES WHEN
New	New lead. The lead has been added, but it has not yet been prioritised.	Moves to Screening once it is taken up for active work.
Screening	Active first check. The lead is being reached, a first meeting booked or product fit confirmed.	Moves to Qualification once first dialogue confirms relevance.
Qualification	Fit and next step. Need, timing, use case, decision path and next action are being assessed.	Moves forward once the opportunity is concrete.
Onboarding	Ready to start. The lead is qualified enough for KYB, technical setup, legal review or commercial setup.	Moves to Customer once the lead is live or close enough to count as active.

Side stages

Side stages keep long-term, parked or closed leads out of the active flow:

Strategic Long-Term — important relationships that matter, but move slowly

Customer — leads that are active, live or close enough to count as customer status

Not Interested — leads that should stop unless timing or relevance changes

The lead card is the quick status view

A lead card is readable without opening it. It shows who the lead is, who owns it internally, which company it belongs to, the product path, any agent or referral, and the next task.

The image shows a lead card with a blue vertical bar on the left. The card contains the following information:

Contact	Person or lead name
OWNER	Internal Aryze owner
COMPANY	Organisation
PRODUCT	Pay by Bank
AGENT	Referral source
TASK	Next action

Lead card overview. The card shows the contact, owner, company, product path, agent and task.

Lead card fields

- **Contact** is the person or lead name at the top of the card.
- **Owner** is the internal Aryze person responsible for follow-up.
- **Company** shows the organisation behind the lead.
- **Product** shows the likely path: Pay by Bank, Digital Cash, Stablecoin Factory or another relevant route.
- **Agent** captures the referral or introduction source when relevant.
- **Task** is the next concrete action, such as follow-up, meeting booking or waiting for response.

Notes, Tasks and Files hold the detail behind the card

Opening a lead card reveals the tabs that carry the working context. The board stays clean; the detail lives inside the lead.

- **Notes — status and history.** What happened, what was sent, what the lead answered and what comes next.
- **Tasks — the next action.** Follow-up, booking, sending material, checking with an agent or waiting for a response.
- **Files — material shared or received.** One-pagers, decks, agreements, screenshots or any document needed to understand the lead.

The board updates as the status changes

The image shows a mockup of a lead card interface. At the top, there are three tabs: 'Notes' (which is active and underlined), 'Tasks', and 'Files'. Below the tabs is a form with the following sections:

- Date:** A light blue rounded rectangle containing the word 'Date'.
- Activity summary:** A text input field with a light gray border and a light gray background.
- CURRENT STATUS:** A text input field with a light gray border and a light gray background.
- NEXT ACTION:** A section containing a light blue rounded rectangle with a white checkmark icon, followed by a text input field with a light gray border and a light gray background.

Note format. Date, short activity summary, current status and next action — clear enough for another team member to understand the lead without asking the owner.
