

Aryze 2026 Objectives

The second-half plan is simple and aggressive: secure the EU operating roof, convert the UK and EU casino pipelines into live merchants, and prove that Aryze can turn monthly transaction volume into durable casino revenue.

Owner: Commercial · Q3 + Q4 2026 · Internal

NORTH STAR

>4.2M monthly casino transactions by 1 December 2026, powered by a combined live base of more than 140 UK and EU casinos.

NORTH STAR

>4.2M monthly casino transactions by 1 December 2026, powered by a combined live base of more than 140 UK and EU casinos.

Headline targets.

The Q3-Q4 execution window, with three dated checkpoints under it.

WINDOW Q3-Q4 Q3-Q4 execution window	UK TARGET >40 >40 live casinos	EU TARGET >100 >100 live casinos	REVENUE TARGET >840k >840k EUR monthly revenue
JULY EU roof EU roof	OCTOBER 400k EUR 400k EUR monthly	DECEMBER 840k EUR 840k EUR monthly	

Six milestones that turn access into revenue scale.

Each month has a concrete operating job. The roadmap moves from regulatory access, to first UK proof, to EU activation, and finally to a combined transaction and revenue proof point.

Operating logic: live casino count is the leading signal.
Transaction volume and monthly revenue are the proof signals.

REVENUE-SCALE
PROOF

DATE	MILESTONE	OPERATING JOB	WHY IT MATTERS
1 July 2026	EU operating roof	Secure the EU licensing roof through Payabl and Volt.	Foundation for EU activation
1 August 2026	First UK live base	Move more than 20 UK casinos live from the 30-casino pipeline.	Commercial proof in production
1 September 2026	UK volume plus EU launch	Reach more than 600k monthly UK transactions and bring 50 EU casinos live.	Two-market momentum
1 October 2026	EU volume converts	Reach more than 1.5M monthly EU transactions and more than 400k EUR in monthly revenue.	First revenue checkpoint
1 November 2026	Live base doubles down	Scale the footprint to more than 40 UK casinos and more than 100 EU casinos.	Installed base for December scale

**1 December
2026**

Revenue-scale
proof

Reach more than 4.2M
monthly transactions and
more than 840k EUR in
monthly revenue.

Board-level
proof point

UK proves transaction density. EU creates the scale curve.

The plan separates two jobs. UK execution is about disciplined conversion of a known pipeline into active transaction volume. EU execution starts with licensing coverage, then turns a much larger pipeline into a live casino base with meaningful volume.

UK MOTION

Transaction density from a focused pipeline

The September volume target is more than 600k UK transactions per month. **20+ of 30 casinos live.**

EU MOTION

Scale curve from licensing coverage

The EU objective is 50 live casinos by September, then 100+ live by November. **50 live by September.**

REVENUE MOTION

Volume translated into recurring revenue

October becomes the first revenue checkpoint, then December doubles the target. **840k EUR monthly target.**

The objective only works if onboarding, go-live and revenue tracking move together.

#	TRACK	JOB	HOW
01	Licensing	Close the EU operating roof	Make Payabl and Volt coverage the foundation for EU casino activation.

02	Pipeline	Prioritise live conversion	Keep commercial energy focused on casinos that can move from pipeline to production.
03	Onboarding	Remove go-live friction	Protect the timeline by making technical, compliance and commercial readiness explicit.
04	Reporting	Track volume and revenue weekly	Use live casino count, transaction volume and monthly revenue as the operating scorecard.

By December, the objective becomes a revenue-scale test.

The final milestone is not just a larger customer count. Aryze should have a live casino base large enough to support more than 4.2 million monthly transactions and more than 840k EUR in monthly casino revenue.

UK LIVE BASE >40 >40 casinos	EU LIVE BASE >100 >100 casinos	MONTHLY VOLUME >4.2M >4.2M transactions	MONTHLY REVENUE >840k >840k EUR
---	---	--	--

MEASURE	TARGET
UK live base	>40 casinos
EU live base	>100 casinos
Monthly volume	>4.2M transactions
Monthly revenue	>840k EUR
July dependency	EU roof
August live base	>20 UK
September launch	50 EU

October checkpoint	>400k EUR
November base	>140 casinos
December target	>840k EUR

What must be true for the roadmap to land.

The objective depends on clear ownership across licensing, sales, onboarding and reporting. The live casino count should be reviewed as the leading indicator, with transaction volume and monthly revenue reviewed as proof that the installed base is performing.

MOTION	WHAT MUST BE TRUE	WHY
UK motion	Convert 30 pipeline casinos into more than 20 live operators.	UK execution proves transaction density before the wider scale curve.
EU motion	Turn licensing coverage into the first 50 live EU casinos.	EU execution converts a larger opportunity base into live volume.
Revenue motion	Translate combined UK and EU volume into monthly casino revenue.	Revenue tracking makes the roadmap commercially accountable.
