WE MASTER YOUR PAYMENTS

— Executive summary

This plan covers July–October 2026. Operating mode: **lead generation and conversion for the whole period**
— Pay by Bank in the live UK market, the EU/EEA added gradually from July once technical go-live on the Volt extension is confirmed, plus one institutional Digital Cash track: a tier-2 bank round table in mid-September.

Sized to support the 2026 Objectives: >20 UK casinos live 1 Aug · 50 EU live 1 Sep · >140 live by Dec · >840k EUR monthly revenue by Dec. Marketing owns the leading indicators below; sales and onboarding own live conversion. Scale logic: platform deals — one platform, many casinos.

The anchors

- Jul 13–17** Maryland Conference — Aryze as sponsor + speaker.
- Early Aug** Announcement sequence — Mastercard, then
~4–5 customer announcements following, each 3–5 days apart ; cadence continues through autumn as sales delivers.
- Aug 20** Tech for Fin — demo day + mentorship program; banks & financial institutions in the room, a Digital Cash lead source.
- Mid-Sep** Digital Cash round table with Copenhagen Fintech — tier-2 banks, 8–12 seats, invitation only.
- Sep 21–25** Nordic Fintech Week — booth + sponsor, TAP1 Copenhagen; giveaway winners hosted; possible Mastercard side event.
- Sep 29–Oct 1** SBC Summit — iGaming pipeline; wrap-up and outreach in October.

Decisions and dependencies for management attention: Mastercard announcement timing (external) · a signed, approval-ready customer from sales by end of July · the exact round-table date with Copenhagen Fintech.

01 Strategic frame

Alignment with the 2026 Objectives. The north star is more than 4.2M monthly casino transactions by 1 December 2026, carried by 40+ UK and 100+ EU live casinos. This plan feeds that roadmap month by month: EU operating roof (July) → first UK live base (August) → EU launch at scale (September) → revenue checkpoint (October). Marketing's contribution is measured in qualified conversations, EU pipeline and platform routes — live conversion is owned by sales and onboarding.

Objective. Generate qualified Pay by Bank leads and convert them into customer conversations — in the live UK market now, and in the EU/EEA from July (gradual start). Alongside this, open institutional Digital Cash conversations with tier-2 banks through the September round table.

Operating mode. Lead generation and conversion for the entire period. The remaining education assets (AMA, "Learn Pay by Bank" video series) are produced and shipped in July, then retired as an active workstream. From August, the blog series carries the educational load as SEO and credibility support.

Around the anchors. A Sushi Night for target accounts at iGB LIVE (1 July, invitations sent), monthly partner workshops, a ticket giveaway feeding the newsletter, two blogs a month, a video education series produced in July, and a short paid push from 1 August (two ads).

PAY BY BANK — CORE

High-risk merchants

UK and EU/EEA, primarily iGaming, casino and betting, 100k+ transactions/month — where card cost, settlement delay, chargeback exposure or payment cost materially affects margin. Buyer: the Payments Operations Lead. UK live and sellable; EU merchants get a live sandbox now — they can start building immediately, no waiting for go-live.

DIGITAL CASH — ROUND-TABLE TRACK

Tier-2 banks

Already-licensed institutions where Aryze provides the infrastructure layer and the bank remains issuer and operator under its own licence. The round table builds pipeline; it does not close deals this quarter.

Anchor message — Pay by Bank. "Get paid faster, with less friction and more control." Every asset traces to this and to at least one brand value (Transparency / Compliance / Excellence).

Partner workshops (last Friday, from August: Aug 28, Oct 30 — September folds into NFW; the July slot is dropped for lead-time) — co-hosted with partners such as Centiglobe and Visa to present joint solutions. One partner, one topic, one named target audience per session.

Digital Cash round table (mid-September, with Copenhagen Fintech) — tier-2 banks, 8–12 seats, Chatham House-style. Proposed theme: "From research to live operation — digital cash settlement under the bank's own licence." Aryze's position in the room: infrastructure provider — the bank remains issuer and operator. Promotion via direct invitations and partner channels only.

Competition — NFW ticket giveaway. Prize: 2× Nordic Fintech Week tickets. Mechanic: newsletter sign-up = entry. Window: Mon Aug 3 – Fri Sep 4; winners announced Mon Sep 7. Dependencies: pop-up live in July; terms & GDPR-compliant consent (legal check); winners hosted at the booth. Measurement: giveaway entrants count as lead capture (newsletter growth) — not as qualified leads.

Ad performance captured in the standardized Pay by Bank Ad Performance Report (from the LinkedIn Campaign Manager export).

Weekly (internal): the marketing team reviews ad performance and adjusts in-flight — formal reporting stays monthly.

End of October: full quarter report against all KPIs, lead-quality assessment, next-quarter recommendation.

Attribution: last-touch via CRM; email via the newsletter platform; event leads logged by sales.

06 Risks & open items

Risks & dependencies

1. EU go-live is an expectation, not a date. If July slips, the EU start and all EU-facing marketing slip with it. Nothing public until confirmed.
2. The announcement cadence depends on sales. The customer announcement requires a signed, approval-ready customer by end of July. If sales does not deliver, the Mastercard announcement runs alone — an unsigned or unapproved customer is never announced.
3. Mastercard timing is external. If the timeline slips, the reception and the sequence slip with it. Reception date held provisionally ± 2 weeks.
4. August is the heaviest month. Priority if capacity tightens: announcements first, then giveaway + pop-up (NFW dependency), then reception. Defer first: the Aug 28 partner workshop.
5. Round-table date not locked. Mid-September is set; lock the exact date with Copenhagen Fintech now; invitations out Aug 24–28.
6. Ownership concentration. Plan, events, announcements and the EU start route largely through Rabii (Gabriel and Gry now share plan/events; content sits with Gabriel) — watch single-owner load across the heavy August stretch.
7. Giveaway compliance. Terms and GDPR consent checked before the Aug 3 open.
8. Product separation. Pay by Bank and Digital Cash stay separate in every asset and conversation. The round table is Digital Cash; everything on social media is Pay by Bank.
9. Objective scale depends on platform routes. 140+ live casinos is not reached through single-merchant sales — platform/aggregator deals are the bridge. Marketing supports this through the partner workshops and 4+ active platform dialogues; if the platform motion does not deliver, the objective should be renegotiated with management early, not in November.

Open items

1. Mastercard announcement timing + press release draft (via Rune).
2. Sales: announceable customer signed and approved by end of July.
3. Lock the exact mid-September round-table date with Copenhagen Fintech; approve theme; finalise tier-2 invite list.
4. Confirm partner-workshop scope, dates and per-session cost (from Aug 28): Centiglobe, Visa, others.
5. Meet-ups and round table: firm up per-session cost once itinerary and guest list are set.
6. Tech for Fin demo day (Aug 20): confirm mentorship slots.
7. SNGS (Oct 22–23, Copenhagen): confirm attendance + passes.
8. Mastercard reception: confirm budget (currently TBD).
9. NFW: confirm Mastercard side event scope (booth/sponsor package committed at DKK 186,500).
10. Brand Guide update.
11. Giveaway terms + consent text — legal check.
12. Confirm the two August ads — creative + $\sim$ £1,500 ($\approx$ DKK 13,000) spend.
